

BRAKE CLEANER

MATERIAL HANDLING

This product is a fast-evaporating cleaner for removing oil, grease, dust, resin deposits and similar things during maintenance, repair and assembly work. The formula is n-hexane-free and has been developed to reduce health and fire risks.

TECHNICAL ADVANTAGES

- Controlled spray jet with minimal mist formation
- Lower explosive limit >1.5% by volume
- Free from n-hexane
- High electrical resistance: >1000 pS/m
- Shorter drying time for faster results

PERFORMANCE FEATURES

- High cleaning power with low hazard potential
- Reduced risk of ignition
- Uses modern cleaning technology
- Minimal overall risk

TYPICAL APPLICATIONS

Use for cleaning:

- Brake parts during maintenance and repair
- Clutch components
- Oil, grease or resin-based contamination
- Varnish-like or tough residues before disassembly or assembly

LIMITATIONS/NOTES

- Do not use on painted surfaces
- Before using the product on plastic surfaces, test it on a hidden area first

INSTRUCTIONS

Please read the full product information before use.

1. Spray the product directly onto the stained surface from a suitable distance.
2. Let the cleaner evaporate completely.
3. When applying to precision areas (e.g. brake calipers, housings), use only short bursts of spray to prevent excessive runoff.
4. If used on food processing equipment, rinse with drinking water afterwards.
5. Ensure that all components are completely dry before reassembling brake or clutch parts.
